Nova M3 CVT310 EO Convertor

Specifications

V2.0 2013-6-21

1. Functions

CVT310 is Nova EO converter device. It has the following characteristics:

- 1) 1 cable interface, 1 fiber interface;
- 2) 100~240V AC 50/60HZ power supply;
- 3) Use multi-mode dual-core optical fiber with LC interface, the transmission distance is 300M;
- 4) No driver required, immediately use after connection;

3. The LED indicator status

LED Indicator	Instruction						
POWER	Power Indicator						
FX/ACT	When optical fiber communications between two CVT310 are						
	normal, the indicators at two sides are on; when there are						
	communications problems between optical fibers, only one						
	indicator is on or two indicators are off.						
TP/ACT	When network cable communications from sending card to						
	CVT310 or from CVT310 to receiving card are normal, the						
	indicator is on continuously, or else it is off.						
DATA	Only when both FX/ACT and TP/ACT indicators are on						
	continuously, DATA indicator close to CVT310 at the end of the						
	receiving card rapidly flashes, or else it doesn't flash.

4. Working conditions

AC	INPUT	Rated voltage (V)	220	Maximum	240	Minimum	100
		Rated current (A)	Maximum		0.7		
DC	OUTPUT	Rated voltage (V)			5		
		Rated current (A)	5
